

Servicing Events with Real-Time Feedback from AirVote®

How It Works - Overview

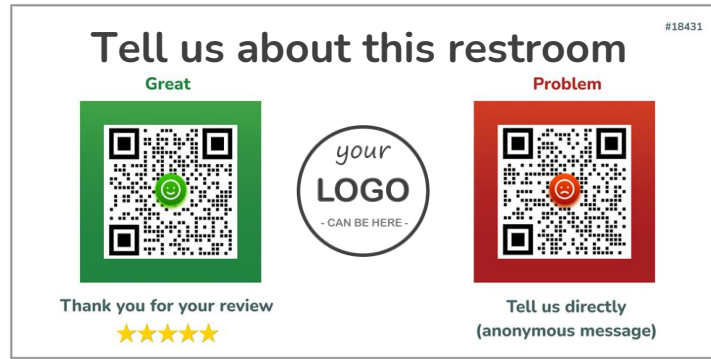

Benefits to the Event Team

How it Works for Your Event Guests

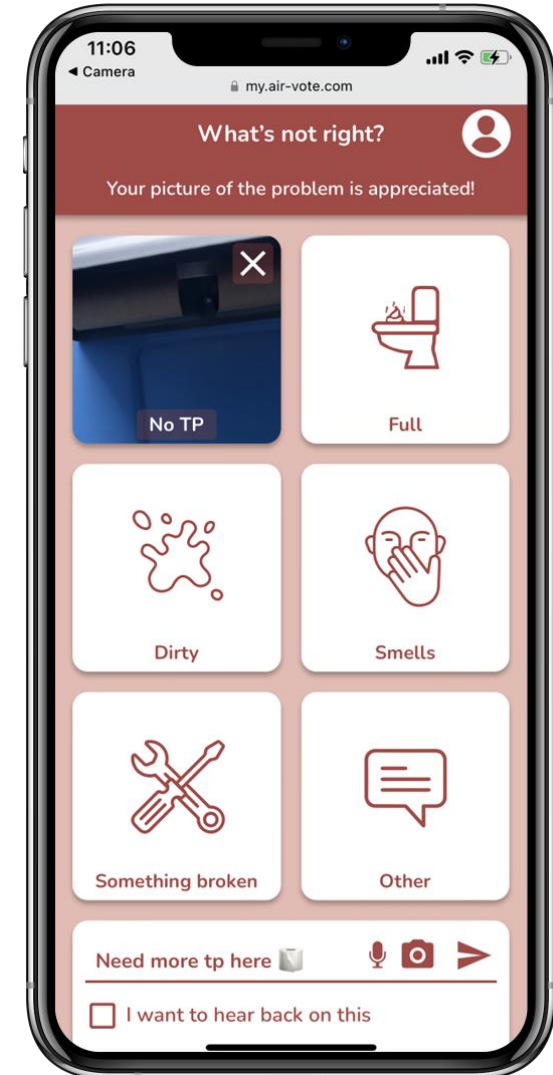

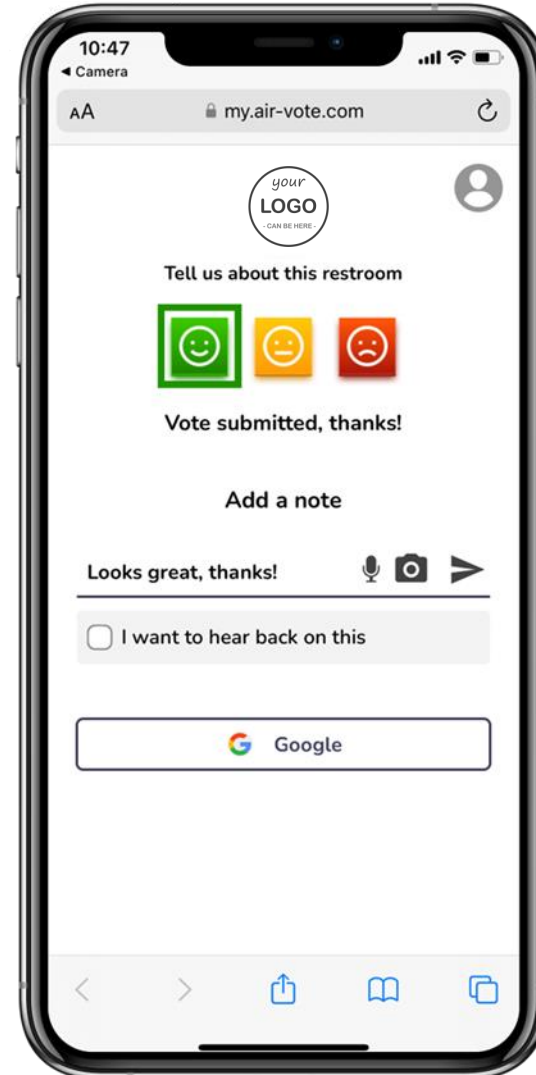

QR codes are posted in each restroom

Event guests scan to give feedback

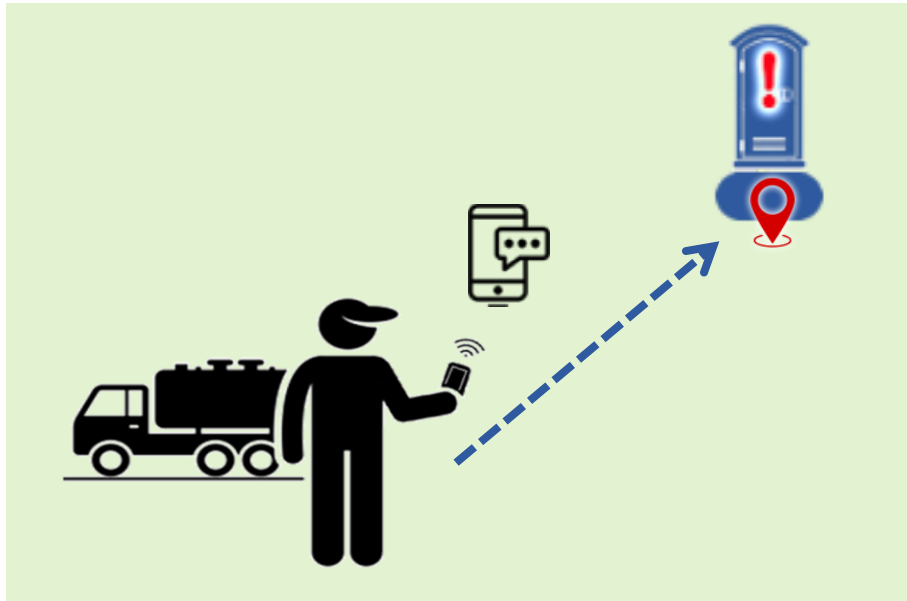

- ✓ Anonymous and instant feedback
- ✓ Tags exact restroom
- ✓ Can include picture of an issue

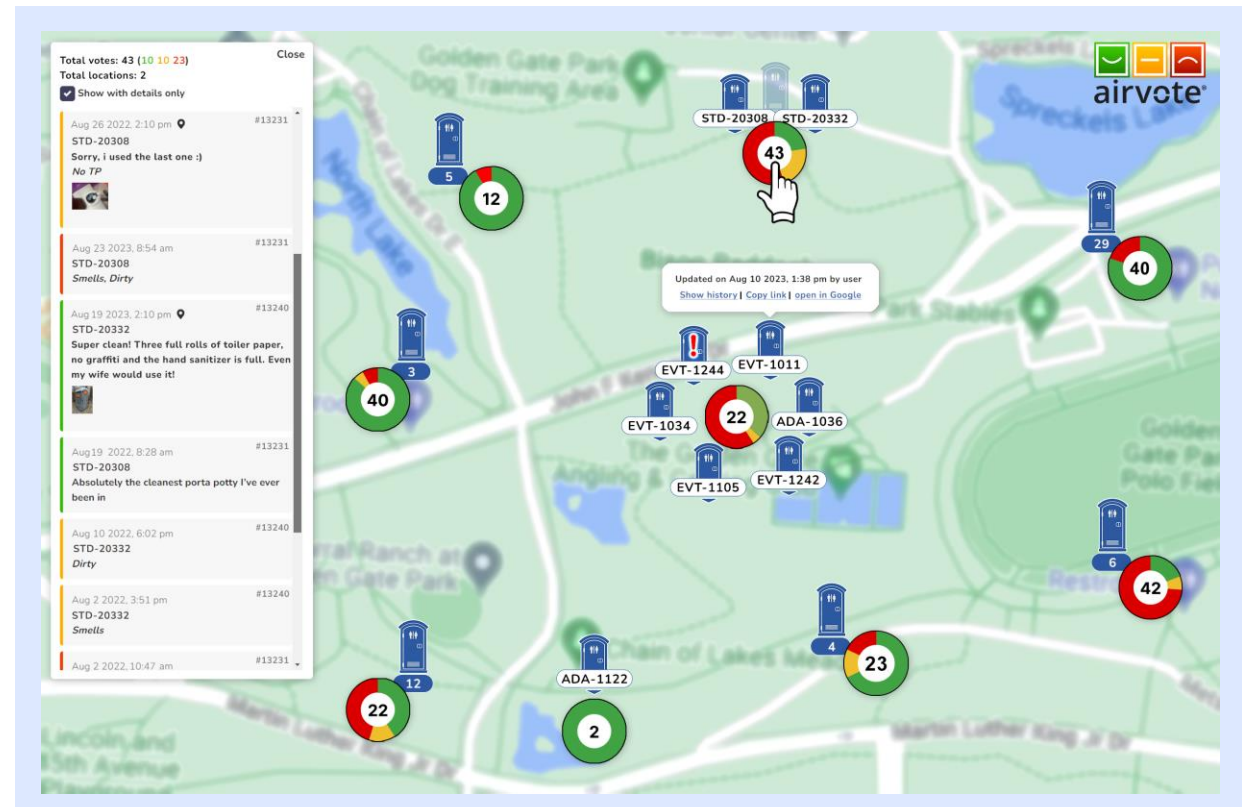

What we do with the feedback

Real-time alerts are sent to the service team

- ✓ With the exact problem location
- ✓ With real-time feedback from your guest

Guest feedback is used to optimize future events

Benefits to the Event Team

Takes Your Guest Experience to the Next Level

- Instant responses to restroom issues between the scheduled cleaning. The time of the restroom needing service is reduced to minutes.

Streamlines Your Operations

- Direct feedback to the service team eliminates changing hands and saves time for event staff to focus on event-related issues
- Feedback of one event organizer, verbatim, *"... since the operator started using AirVote in our event restrooms, we had literally zero escalations to the event staff on restroom facilities issues"*

Perfects Your Future Event Planning

- Year-over-year comparison of the user feedback helps pinpoint areas of high or low use and optimize unit locations

Thank You!
